## PROFESSIONAL SUMMARY

SOC Analyst with 2+ years of experience in enterprise security monitoring, alert triage, and incident investigation. Correlate SIEM, EDR, identity, email, and cloud telemetry to validate threats, assess severity, and support escalation. Hands-on with Devo SIEM, CrowdStrike Falcon, AWS, Microsoft Azure, Microsoft Entra ID, Microsoft Defender for Cloud, IOC analysis, OSINT, and MITRE ATT&CK.

## PROFESSIONAL EXPERIENCE

**MPHASIS, Bengaluru — Security Operations Center (SOC) Analyst** | Sep 2024 – Present

- Monitor and triage enterprise security alerts in Devo SIEM. Correlate logs and security signals to validate alerts, assess severity, and route escalations.
- Investigate phishing, malware, suspicious IP/domain activity, unauthorized access, and abnormal network behavior across endpoint, email, identity, and cloud environments.
- Investigate AWS and Microsoft Azure security alerts using identity, access, and activity telemetry. Validate suspicious behavior and support escalation and resolution.
- Investigate Microsoft Entra ID and Microsoft Defender for Cloud events. Assess exposure, review posture and vulnerability findings, and validate remediation.
- Investigate endpoints in CrowdStrike Falcon. Correlate EDR telemetry with SIEM and other security signals to establish an evidence-based view of suspicious activity.
- Manage incident workflow in ServiceNow, including severity assessment, escalation, SLA adherence, root-cause analysis, investigation timelines, and closure documentation.
- Apply IOC analysis, OSINT, and MITRE ATT&CK to validate threats, understand adversary behavior, and produce structured analyst-ready findings.

## SELECTED PROJECTS & INVESTIGATIONS

**IntelShield AI — AI-Assisted SOC Investigation Platform.** Built an AI-assisted SOC investigation platform for IOC enrichment and OSINT. Added FAISS/RAG investigation memory, risk scoring, MITRE ATT&CK mapping, and structured threat reports.

**Home Lab SOC — Detection & Investigation Laboratory.** Built a Wazuh SOC lab for Windows telemetry, attack simulation, alert triage, log correlation, and detection engineering. Documented PowerShell 4104, network reconnaissance, and authentication-attack cases.

**Security Investigation Write-ups.** Published investigations covering suspicious PowerShell execution and a suspicious .REG file, including alert validation, IOC analysis, telemetry review, response decisions, and lessons learned.

## TECHNICAL SKILLS

**SOC Operations:** Security Monitoring, Alert Triage, Incident Investigation, Severity Assessment, Escalation, SLA Management, Root-Cause Analysis, Incident Documentation

**Threat Detection & Analysis:** SIEM Analysis, Log Correlation, Detection Engineering, Threat Hunting, IOC Analysis, OSINT, MITRE ATT&CK, Phishing Analysis, Malware Analysis, Threat Validation

**Cloud & Identity Security:** AWS, Microsoft Azure, Microsoft Entra ID, Microsoft Defender for Cloud, Cloud Security Events, Identity & Access, CASB

**Endpoint & Security Tools:** CrowdStrike Falcon, Secure Email Gateway, Avanan, Check Point

**Automation:** Python, LLMs, RAG, FAISS, SOC Automation, AI-Assisted Threat Investigation

## CERTIFICATIONS

Microsoft Certified: Security Operations Analyst Associate (SC-200) | CompTIA Security+ (SY0-701) | Google Cybersecurity Professional Certificate

## EDUCATION

B.Tech. — JNTU Kakinada | Jun 2020 – May 2023 | Diploma — Gudlavalleru | Jun 2017 – May 2020

## TECHNICAL WRITING

[Investigating a Suspicious PowerShell Script Execution](#) | [Investigating a Suspicious .REG File](#)
