Location : Vijayawada, Andhra Pradesh, India

EXPERIENCE

Mphasis, Bengaluru — Soc Analyst (First Responder)

September 2024 - PRESENT

- Perform continuous security event monitoring and alert triage across enterprise environments using **SIEM (Devo)**.
- Analyze logs and investigate alerts related to **phishing, malware, IOC activity, and suspicious IP or domain behavior**.
- Conduct threat detection and validation across **endpoint, email, cloud, and identity platforms**.
- Work with **CrowdStrike Falcon (EDR)** for endpoint investigations and containment support.
- Investigate email-based threats using **Secure Email Gateway, Avanan, and Check Point solutions**.
- Monitor cloud security events across **AWS and Microsoft Azure**, and enforce access controls using **Microsoft Entra ID (Azure AD)**.
- Utilize **CASB (Netskope)** to monitor and control cloud application access and data movement.
- Track organizational security posture using **SecurityScorecard and BitSight**.
- Manage incidents and escalations through **ServiceNow**, ensuring SLA adherence.
- Prepare structured **SOC documentation**, including incident summaries, root cause analysis, investigation timelines, and escalation records.

TECHNICAL SKILLS

SOC & Security Operations : Security Event Monitoring, Alert Triage, Incident Handling, SOC Reporting, SLA Management.

SIEM & Monitoring : Devo SIEM, Log Analysis, SecurityScorecard, BitSight

Endpoint & Email Security : CrowdStrike Falcon (EDR), Secure Email Gateway, Avanan, Check Point

Identity & Access Management : Microsoft Entra ID (Azure AD).

Network & Perimeter Security : Fortinet, Check Point, Cisco, Palo Alto Firewalls, IDS/IPS, Proxy, DNS Security.

Cloud & CASB : AWS, Microsoft Azure, Netskope.

Threat Intelligence : IOC Analysis, OSINT, MITRE ATT&CK

Automation & AI : LLMs, Python, SOC Automation Concepts, RAG, FAISS.

PROJECTS

IntelShield AI – Autonomous SOC Investigation System

- Designed and developed an AI-driven SOC automation platform to analyze **IPs, URLs, domains, and file hashes**. – Automated IOC enrichment and OSINT validation with contextual memory using **FAISS and RAG techniques**

- Implemented AI-based reasoning to generate **risk scores, MITRE ATT&CK mappings, and analyst-ready threat reports**.

- Reduced manual investigation time and analyst effort through automated threat analysis workflows.

CERTIFICATIONS

Microsoft Certified: Security Operations Analyst (**SC-200**).
CompTIA Security+ (**SY0-701**).
CrowdStrike Incident Responder Certification.
Google Agentic AI Developer Certification.

EDUCATION

Jntu, Kakinada – B.Tech.

June 2020 -May 2023

Gudlavalleru — Diploma

June 2017 - May 2020
